

Taylor Burke

(918) 361-2448

hello@taylorburke.me

Aloha,

After closely reading your job description for a Pega developer, I understand that I am qualified for this position. More importantly, I believe that the company culture at WTW is one where I could thrive.

I understand that WTW developers are expected to really take ownership of their projects. I have experience with this in my prior work as a Project Manager. As a PM it was my responsibility to keep jobs on track, support the client, and take full responsibility for project results.

I also have experience as a programmer. I build applications with JavaScript and have understanding of other Object-oriented languages. I can learn new languages very quickly.

I'm seeking full-time positions doing application development in the SLC area. I would love to have a moment to meet with one of your hiring managers this week and talk about my strengths and weaknesses.

I have attached my resume. All of my references are familiar with my work as a PM and as a developer.

Sincerely,

Taylor W Burke

Developer / PM
